The standard PickleBall Court measures 20 feet wide x 44 feet long. The same area is used for both singles and doubles matches. Court measurements are to the outside of the sidelines and baselines. All court lines should be 2" wide and be a contrasting color from the court surface.

The non-volley zones are 7 feet from the net. Centerlines divide the Left Service Area and Right Service Area equally.

The net should be at least 20 feet in length, 36" high at the sidelines and 34" high at the center of the court. The mesh of the net should be small enough to prevent the ball from passing through.

The PickleBall Court should be centered in an area 34 feet x 64 feet, allowing sufficient space for recreational and tournament play.
